Welcome to the World of Sunless Tanning!

Airbrush Tanning is a great way to get a quick, easy tan without the hassle of going in a tanning bed everyday to achieve maximum color. It is great for weddings, prom, special occasions, and those expecting. The active ingredient in the solution is DHA. DHA reacts with the protein in the skin to produce a tan.

This is completely safe. The first application usually lasts 5-7 days, depending on activities done during the duration of the tan. A repeat application will darken the tan. The process usually takes around ten minutes. You will fan dry for about 5 minutes then go in the stand-up VHR for 2 minutes. This will activate the DHA and dry the application. It is recommended you wait 4 to 6 hours until you shower, swim, exercise, etc. This allows the color to deepen into the skin and will prevent any streaking.

After showering we recommend you apply an after-tan extender. This helps moisturize your skin as well as lengthen the life of the tan.

Recommended After-Tan Extenders:
Brown Sugar,
Hempz, and Ritual. All
25% off with a spray tan.

Here's what to do...

1. Call the salon and make an appointment!
2. Shower, exfoliate, and shave before you come.
3. Remove all make-up!!
4. DO NOT put any lotion on before. This will cause it to streak.
5. Wear loose fitting clothing to your appointment.
6. Wait 4 to 6 hours to shower or exercise after application.
7. DO NOT exfoliate after application.
8. Stay away from hot tubs, pools etc, this reduces the life of the tan!
9. Moisturize daily with a tan extender.
10. Come back within a week!

Prices

Full Body= \$30.00

Half Body= \$20.00

Face= \$10.00

2-minute stand-up= \$2.00
